Education

2014–2018 **Master of Computer Science**, *University of Bonn*, Germany.

2010–2014 **Bachelor of Computer Science**, *Azerbaijan State Oil Academy*, Azerbaijan.

Skills

Backend Java (8, 11, 17, 18), Javascript (ES6+), TypeScript, CoffeeScript, Python
Frameworks Spring Framework (Spring Boot, JDBC Template, Security, Data JPA, AOP),
Quarkus, Hibernate, React Native, Angular 18, Django, Play Framework, Express.js,
GWT
Frontend React, Ajax, JQuery, Bootstrap 3, Materialize, Kendo, Scss, Sass, Less
CI/CD Docker, Jenkins, CircleCI, Bitbucket pipelines, Gitlab pipelines, Bamboo
Testing JUnit, Mockito, Jest
Databases SQL, MySQL, PostgreSQL, Mongo, DB2, Firebase
Build tools Maven, Gradle, SBT, ANT

Experience

April 2022 – **Software Developer**, *Dedalus HealthCare GmbH*, Bonn, Germany.

- Currently
- Development of an API based on Quarkus, and integration into the Camunda Engine using REST architecture and Kafka for event-driven microservice communication
 - Development of an online front desk and waiting room for a hospital, using Spring Boot and Angular integrated with Grafana dashboards
 - Development of a patient portal for a hospital, using Spring Boot and Angular and Elasticsearch for fast medical data retrieval
 - *Technologies: Java, Quarkus, Spring Boot, Angular 18, Kafka, Grafana, Elasticsearch, Docker*

- September 2020 - March 2022 **Software Developer, Universitätsklinikum, Bonn, Germany.**
- Development of a visualization and search solution for FHIR bundles using Angular technology
 - Development of additional modules to transform medical data into FHIR entities
 - Development of a patient portal for a hospital, using Spring Boot and Angular
 - Technologies: Java, Spring Boot, Quarkus, Angular, Docker*
- April 2019 - August 2020 **Software Developer, CodeFrog, Braunschweig, Germany.**
- Working on different projects for different clients
 - Creating financial mobile app for stock trading with the following tech stack: React Native with Spring Boot backend and Bitbucket Pipelines with Docker for CI/CD
 - Creating time management web app based on Angular with Spring Boot backend and Jenkins with Docker for CI/CD
 - Creating platform for management of vehicle delivery and sales based on Angular with Spring boot backend and Bamboo for CI/CD
 - Technologies: Java, Typescript, Spring Boot, Angular, React Native, RxJS, Redux, Mongo DB, MySQL, Docker, Jenkins, Bamboo, Bitbucket Pipelines, Jest, Mockito, SonarQube*
- June 2017 - March 2019 **Software Developer, Peter L. Reichertz Institut for Medical Informatics, Braunschweig, Germany.**
- Development of rule-based reward system with Play Framework
 - Extending an existing Java-based back-end service for clinical trial management system
 - Managing deployment server, together with database administration and ci/cd pipelines
 - Technologies: Java, Javascript, Play Framework, Hibernate, GWT, MySQL, BitBucket pipelines, Docker*
- Aug 2016 - June 2017 **Web-Developer, Advanced Dynamics, Cologne, Germany.**
- Working on different projects
 - Development of internal time management calendar based on Angular
 - Building several media apps on WordPress
 - Development of web scrapping tools
 - On-going maintenance of apps with constant user flow
 - Technologies: PHP, Cake, Angular, MySQL, WordPress*
- May 2016–Oct 2016 **Backend Developer (internship), Brav Conflict Resolution, Michigan City, Indiana.**
- Utilized WebRTC technology for real-time communication between users
 - Development of dynamic user interface
 - Technologies: PHP, Javascript, JQuery, MySQL, WebRTC*
- Dec - March 2016 **Student Assistant, University of Bonn, Bonn, Germany.**
- Developed custom scripts to prevent spam on MediaWiki-based websites
 - Utilized a combination of PHP, Javascript, and JQuery for development
 - Integrated with MySQL database management system for data storage and retrieval
 - Enhanced security and functionality of the MediaWiki platform
 - Technologies: PHP, Javascript, JQuery, MySQL, MediaWiki*

Freelance Projects

- DiscoverDE  **React Native based German language preparation app**
- Development of learning options - both listening and reading modes
 - Multilingual (Russian / English)
 - Development of interactive quizzes and tutorials

- Java-1Z0-808 
 - React Native based Java 1z0-808 exam preparation app
 - Choice to select quizzes randomly or by chapter
 - Option to mark questions for further review
 - Statistics tracking for correct and wrong answers
- Bulls&Cows 
 - React Native based code-breaking game
 - 2 Game modes: Competing against AI & Number finding challenge
 - Game features statistics tracking for wins and losses
 - Added badges that can be earned by winning within a predefined number of steps
- ADHD
 - React Native and Java-based mobile app for ADHD sickness
 - Implemented the state management layer
 - Created several endpoints for CRUD operations
 - Utilized Docker to containerize the app
- Graiger Scrapper
 - Django-based Telegram bot designed to scrape data from automotive websites
 - Developed the data scraping component
 - Utilized the long polling mechanism to ensure real-time communication
 - Integrated the bot with Django's ORM
- My Cashier
 - Development of a Java-based desktop middleware
 - Implemented the connection and data transfer mechanism using the Bluetooth protocol
- Medicolonia
 - Express.js based web app of the medical system
 - Developed an intuitive and user-friendly interface
 - Ensured that the user interface was compatible with a variety of devices
- Can Staging
 - Express.js based web-app for detection of various cancer stages

Publications

Sep 2019 *Pay for Performance in Electronic Data Capture for Clinical Trials and Medical Registries*, ICT for Health Science Research, EFMI 2019, IOS Press Ebooks

Certifications

July 2023 Java SE 8 Programmer, *Oracle Certified Associate*

Languages

Azerbaijani **Mothertongue**

Russian **Mothertongue**
English **Advanced**
Deutch **Advanced**
